

Centralized Message Management Made Easy

Multi Site management of music and messages just got easier with iMCM

Interalia's Multi-Site Content Manager (iMCM) for iProMOHs allows organizations with multiple locations to easily create and manage recorded announcements, music-on-hold, and overhead music and messaging.

Whether you are managing a single unit or large, multi-site installations, iMCM simplifies messaging and music across geography, time zones and demographics. The iMCM file management system allows managers to apply content and schedules to global, regional, or local playlists, eliminating the need to manually replicate schedules, music or messages for each location.

iMCM provides easy-to-use features:

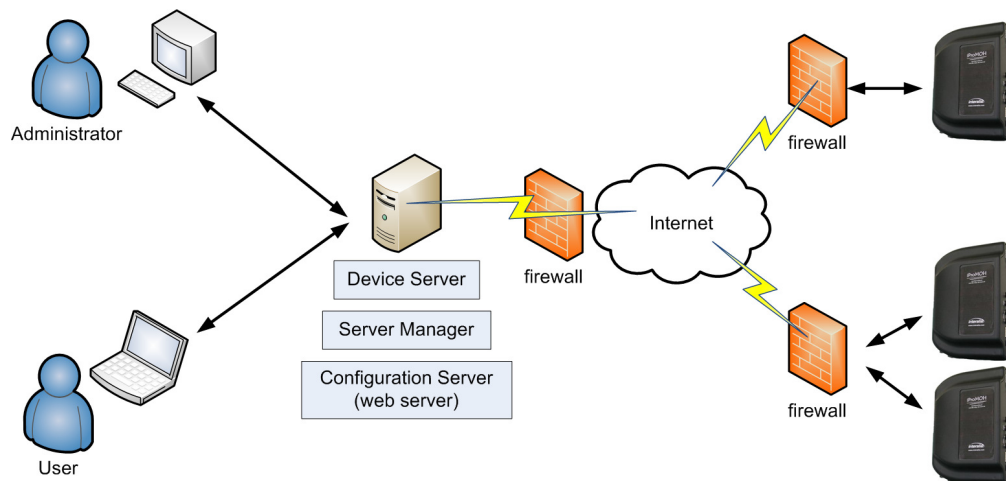

- Time and date message scheduling capabilities
- Priority message scheduling
- Ability to copy and paste schedules, groups or entire configurations
- Update single, multiple or all iProMOHs from any location
- Intuitive folder structure similar to Microsoft Windows
- Secure web access used to update user-specific folders
- Flexible scheduling of iProMOH check-in/update times
- Configurable back-up schedule
- Application activity logging and notifications
- Detailed schedule reporting
- Bulk audio uploads
- Bar code scanner available to associate iProMOHs with iMCM

Music & messaging managed by anyone, anytime, anywhere

Each site requires an iProMOH:

- Plug and play IP-based messaging appliance that delivers high-quality music and messaging-on-hold
- Dual independent output channels
- Up to 12 hours of onboard flash storage available
- Multiple file formats automatically converted (MP3, WAV, WMA, AU and OGG)

The Interalia suite of messaging solutions has been deployed in a variety of markets for over 35 years. Our proven audio broadcasting capabilities are cost-effective, easy to manage and flexible enough to meet your current and future messaging needs.

iMCM: The flexible, network-based music and messaging management solution

Flexible:

- Manage centrally from a client/server environment
- Assign user access to regional or local folders
- Install on your premises or in secure hosted environment
- Partner with content providers for full turnkey solutions
- Maintain web access to self-managed folders from third-party hosted solutions
- Schedule priority messages
- Cross-fade stored music or external music feeds with recorded messages for professional results

Efficient:

- No licensing fees
- Minimal PC/host requirements
- Microsoft compatible: Windows 7, Windows XP, Server 2008
- Minimal technical support requirements
- Nominal learning curve
- Built-in audio file conversion
- Update scheduler to allow maximum network utilization
- Real-time updates from content providers without local support or intervention

Effective:

- Manage iProMOH fleet centrally, including content, schedule, reporting and firmware updates
- Create and implement messages on the fly or schedule 12 months in advance
- Create unique play lists and schedules for each available iProMOH channel
- Integrate and manage global, regional, and local messages and schedules
